Sample document

Summary. This is a document created out from HTML5 and CSS code. The document includes a few standard document elements to better illustrate the package functionality.

Some random content

This is a paragraph where we are going to include a couple of elements. Here we include a footnote[1] and also a link to HTML52PDF website.

A nice table

Let us include a nicely formatted table:

First Column	Second Column	Third Column
Row 1	C_1_1	C_1_2
Row 2	C_2_1	C_2_2
Row 3	C_3_1	C_3_2

A nested list

In order to finish the example a nested list:

- This item has a **sublist**:
  - *Subitem 1.*
  - *Subitem 2.*
- The final item.

---

[1] To include a footnote is as simple as this.
